

What does the word GOD mean to you?

What does the word GOD mean to you? Everything? Nothing? The field? That which has no name? THY, The Infinite, Cosmic consciousness? Universal Love? The Power of the Universal Force of connection and love? The Source of All that is? or just 'Source.' Which is a little culinary in my mind so I use the word GOD. For me, that's simple, comprehensive and embraces my, almost eighty years, of inner transformation and integration. Can you use a word that suits you? e.g. 'THY' is neutral.

What if GOD, THY will, is an evolutionary journey? Right here, right now?

Quantum Physics, whereby our emotions, thoughts and perceptions co create our world in an ever-changing process, has shifted our identity. As we realise that we don't just live in the universe, the universe lives in us, the Quantum co creation story invites us to consider, "Who am now?" "Am I really God stuff in a biodegradable earth body suit with access to the whole Universe, All that is?"

It is hard to believe, but did you know that people in the Western world were once afraid of zero? Of nothing? They thought it dark, black, not good like light and day. Why? It seems that the Greeks; Pythagorus, Aristotle, Ptolemy and the Roman-African Saint Augustine, liked the idea of daylight and a perfect, logical Universe.

For a long time people in the Christian Western world looked on zero, nought, nothingness, with aversion. At the same time, many ancient cultures of the East; Mayans, Babylonians, Sumerians and Indians, actively explored Zero, Nothingness, the Infinite and the VOID for almost a thousand years before the West did. They found infinity. For them, nothingness was what the world came from and nothingness was the ultimate goal.

Zero 0, is the key to the whole language of numbers. Add zero to a number and it won't become bigger. Subtract zero from a number and it won't become smaller. Zero sits in the centre of the number line between the minus numbers and the plus numbers. Between Creator AND Destroyer.

"The method of the Indians surpasses any known method. It's a marvellous method. They do their computations using nine figures and the symbol zero."

The Italian Mathematician Fibonacci 1,200AD.

By 1277 religious leaders had decided that God was not limited by logic.

They accepted zero and Nothingness as part of the creative process of our world. Our evolution. Today scientists believe that the Universe arose from Nothing and will return to Nothing. Infinite. Eternal.

"If the doors of perception were cleansed, everything would appear as it is, Infinite"

William Blake

A story was waiting. It was without form.
